CLAIMS:

1. A method for treating a hyperplastic adrenal medulla, the method comprising the step of administering to the patient an effective amount of a botulinum toxin thereby treating a hyperplastic adrenal medulla.
2. The method of claim 1, wherein the botulinum toxin is botulinum toxin type A.
3. The method of claim 1, wherein the botulinum toxin is selected from the group consisting of botulinum toxin types A, B, C, D, E, F and G.
4. A method for treating a hyperplastic adrenal medulla, the method comprising the step of administering to a hyperplastic adrenal medulla of a human patient a therapeutically effective amount of botulinum toxin type A, thereby treating the hyperplastic adrenal medulla.
5. A method for treating a hypertonic adrenal medulla, the method comprising the step of administering to the patient an effective amount of a botulinum toxin thereby treating a hypertonic adrenal medulla.
6. The method of claim 5, wherein the botulinum toxin is botulinum toxin type A.
7. The method of claim 5, wherein the botulinum toxin is selected from the group consisting of botulinum toxin types A, B, C, D, E, F and G.
8. A method for treating a hypertonic adrenal medulla, the method comprising the step of administering to a hypertonic adrenal medulla of a human patient a therapeutically effective amount of botulinum toxin type A, thereby treating the hypertonic adrenal medulla.
